

IN VITRO FERTILIZATION (IVF)

In vitro fertilization, commonly known as (IVF), a type of assisted reproductive technology (ART), is used to help infertility when other medical and surgical interventions fail to respond. During IVF, mature eggs from the woman's ovaries are collected and fertilized by a man's sperm in an incubator outside the woman's body. The fertilized egg (embryo) is transferred back to the woman's uterus. The entire cycle of IVF generally takes about three weeks. The IVF procedure does not necessarily involve fertilization between Your Eggs and Your Partner's sperm. It is also possible to use sperm, eggs, or even embryos from anonymous donors.

Below is the list of Best IVF Centers in Trivandrum ;

1, PRAN FERTILITY AND WELL WOMAN CENTRE

2, KJK Fertility & Well Woman Centre

3, PRS Fertility & IVF

1, PRAN FERTILITY AND WELL WOMAN CENTRE

PRAN started as the brainchild of Dr. Anupama R who believed in the sheer power of a woman supporting another. At that time, infertility was an issue that quietly and insidiously affected women everywhere, irrespective of social or economic background. Infertility treatment was still a luxury afforded to those who were able to pay for the expensive medicines and access the opulent lifestyle. When we started PRAN, we wanted to be able to reach all those out there who harbored the secret pain of feeling incomplete and reassure and support them in their journey. We don't just provide them with low-cost healthcare; we make it accessible, affectionate, and intimate. The personal attention to the needs of every patient, served with a sense of empathy and caregiving that is unparalleled has been the highlight of every client experience at PRAN. This is further accentuated by the community of women that form the backbone of PRAN. This is an institution that is built by women for women and consequently is able to respond and react to women and their concerns on a more empathetic level. Subsequently, we also strive to be a calm and safe space for women, providing personalized comfort and security, especially in these troubled times. We believe this to be a small step in our journey and hope to achieve not medical miracles, but rather give miracles to those who gave up on their dreams.

2, KJK Fertility & Well Woman Centre

When you decide to seek fertility help, you'll quickly realize there are plenty of clinics out there that can help. At first glance, they can look pretty similar – but this couldn't be further from the truth.
